

Product information

G Data TotalCare 2011

Simple. Secure. Resource saving.

Improved award-winning virus protection, optimised user guidance and „silent“ firewall for monitoring all online activities. In addition, G Data TotalCare also offers efficient security tuning and the ability to backup data to a wide range of storage media.

Maximum security from the record test winner:

- Constant optimum virus detection
- For many years the quickest response time to new viruses
- The latest methods for detecting unknown viruses (behaviour blocking, heuristics, cloud security)

Simple user guidance - ideal for beginners:

- With new “one click” user interfaces - everything at a glance
- Automatically carries out all protection functions undetected in the background
- Silent firewall without annoying querying

Includes a year's licence inclusive of hourly virus updates, new software updates and version upgrades. With 24h/365 day service hotline.
